

Ayodele

Abuja Nigeria, ayodeleabigailofficial@gmail.com, +2347066301932

A software developer with 6+ years of experience in developing web applications with strongest skills being PHP and MYSQL. Experienced in designing system architectures and solutions for rapid scaling. Have significant experience working in startups and fast-moving teams with fixed deadlines. Flexible with different technologies and methodologies, and so am able to learn and adapt to new environments quickly.

Technical Skills

MySQL

REST/RESTful APIs

Laravel

PHP

Additional skills:

Web Development

PHP|Laravel

JavaScript|jQuery

Git|Linux

YAML|Ansible

MySQL|T-SQL

HTML|CSS

Apache|NGINX

Agile|JIRA

Work History

Software Developer

September 2019 - March 2022
2 yrs 6 mos

Page Financials Limited

Human Resource Management Solution

<https://payroll.pagefinancials.com/>

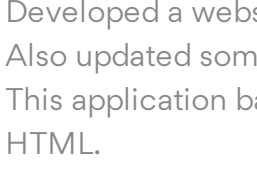

The Payroll Project is a web application designed to automate most HR tasks. I worked on the back-end by providing REST/RESTful APIs with 100+ endpoints for the front-end developers using the LAMP Stack. The functions are not limited to, but include: loan requests, leave management, payroll management, staff confirmation and onboarding, appraisal, exit management, training, events, internal blogs, expense claim, increment, and promotions, surveys and disciplinary management.

We recently deployed the second version and it has successfully been servicing Page Financials with a staff strength of 600+ users for about 2 years now.

Paycode Integration

Handled the backend integration to Interswitch Paycode with PHP (REST / RESTful APIs) which was implemented as a Web service, this resulted in creating six(6) endpoints for Paycode Generation, Re-Query, Cancelling, Authorization, Reversal, Transaction check. The Paycode Technology allows card less withdrawers on ATMs via a Paycode.

Some technologies used includes: Git, PHP, MySQL, LINUX, LAMP etc.

The Product is Live now under our USSD (which consumes our Webservice)

PHP/MySQL

Page Collaborations

<https://pagefinancials.com/collaboration.php>

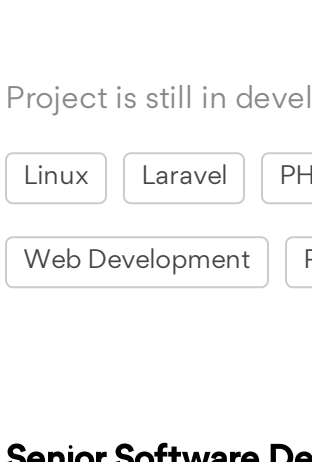

Developed a website and a Content Management Admin for the website. Also updated some functionalities on the existing application page. This application back-end was written in PHP and MYSQL, while the frontend in JavaScript, CSS & HTML. Handled both the front-end and the back-end of the project, was the sole developer on this project.

The web application is currently live and in use.

Backend Developer

January 2021 - July 2019
6 mos

Supremelogic Integrated LTD

Worked as a backend developer on the Where we all meet project, we were a team of 4 and worked remotely as we were based in different countries, we had daily standups.

WWAM

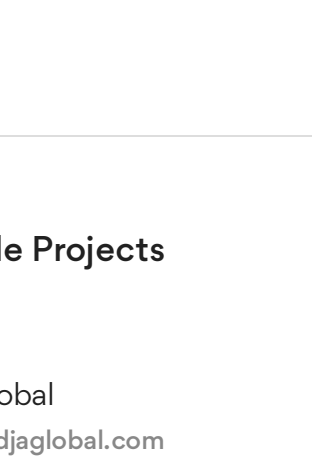

<https://github.com/pearlsilver35/wwam>

Reimplemented the where we all meet backend codebase in Laravel as it was previously written in fuel PHP, Provided REST/RESTful APIs Endpoints for the Mobile developers and Web UI Team. There were serval integrations like the Twillo SMS API etc. Apart from Delivering the required API endpoints. Refactored and optimized the matching algorithm for better performance and easier maintenance.

Project is still In development

Side Projects

Dodja Global

<https://dodjaglobal.com>

A corporate website with full CMS functionality, built with the Laravel framework for Dodja Global a consulting company with functionality not limited to: blog, services, FAQ, contact us, newsletter subscription, social media, etc.

JavaScript CSS Laravel PHP/MySQL PHP, Laravel HTML

Zitra Investment

<https://zitrainvestments.com/>

I implemented the Zitra Investment and Loans Company Website based on the PSD files provided by the UI Designer I developed this using HTML,CSS and JS

JavaScript CSS jQuery HTML

Prime Pay Africa

<https://prime-pay.africa/>

The PrimePay website offers a 'buy now pay later' service to individuals. As the UI/UX designer, I implemented the website design using HTML, CSS, and JavaScript based on the Figma design provided by the graphics designer. Although I did not interface with the backend team, I ensured that the UI/UX was designed to seamlessly integrate with the website's backend functionality.

JavaScript CSS HTML
